Portfolio | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Passionate and goal-oriented iOS Developer and aspiring Software Engineer with a solid foundation in C++ and Data Structures & Algorithms (DSA). Hands-on experience architecting and building modern mobile applications using Swift and SwiftUI, leveraging clean architecture principles (MVVM) and modern concurrency.

TECHNICAL SKILLS

Languages: Swift, C++
Frameworks & Core: SwiftUI, SwiftData, MVVM Architecture)
Tools & Version Control: Xcode, Git & GitHub, Visual Studio Code
Core Competencies: Data Structures & Algorithms, Object-Oriented Programming (OOPs)

PROJECTS

Student Placement Predictor [GitHub] | *Team Lead & App Architecture, Swift, SwiftUI, MVVM* April 2026 – Present

- It developing based on the real data - set.
- Maintained focus on optimizing application flow for processing student academic metric into real - time visual insights.
- Spearheaded a 4-member team, managing project timelines, application layout design, and Git version control workflows.
- Architected the complete iOS client frontend and UI using modern SwiftUI frameworks to process academic metrics into real-time visual insights based on real datasets.

Network Directory [GitHub] | *iOS Developer, Swift, SwiftUI, REST API, JSON, MVVM* July 2026

- Developed an iOS application to fetch, parse, and display network directory data from RESTful APIs utilizing `URLSession` and modern Swift concurrency (`async/await`).
- Maintained a scalable codebase following the MVVM design pattern for a strict separation of network operations and UI layers.
- Designed a responsive UI featuring custom search functionality, category filters, and robust error/loading states.

EDUCATION

Institute of Technology and Management (ITM) Gwalior, Madhya Pradesh
B.Tech in Computer Science and Engineering *August 2024 – Present*

CERTIFICATIONS & ACHIEVEMENTS

- **Decode DSA with C++ (PW Skills)** [View Certificate]: Completed comprehensive coursework covering core data structures, algorithms, memory management, and rigorous problem-solving assessments.
- **Competitive Programming:** Solved 200+ problems on LeetCode with a strong focus on runtime efficiency, space-time complexity optimization, and algorithmic patterns.
